

BioPure

Probiotic Household Cleaning
Concentrate (General Purpose)

All natural and organic
household and industrial
cleaner

Highly concentrated

Breaks down grease,
grime and dirt

Powerful probiotic
bacteria, antioxidants and
enzymes

Sublime vanilla aroma

Probiotic Household Cleaning

BioPure is a highly concentrated, all natural household and industrial cleaner containing powerful probiotic bacteria, antioxidants and enzymes that break down grease, grime and dirt and neutralise odours. BioPure means cleaning without chemicals; its living benefits continue to work even after the initial application.

Cleaning With Good Bacteria

The probiotic properties of BioPure ensure it is eminently safe for humans and the environment. It is uniquely effective as a surface active agent to ionize and digest organic matter for surface cleaning and odour reduction. It can be used safely in septic systems and is fully biodegradable. BioPure can be used as a general purpose household cleaner, for floors, kitchen surfaces, mould and mildew areas, and bathrooms. BioPure is a probiotic cleaning liquid and works differently to anti-bacterial products, which attempt to kill bad bacteria. BioPure utilises beneficial bacteria to regenerate and repopulate with healthy bacteria so they can dominate harmful, disease-causing (pathogenic) bacteria. This creates a natural, healthy and clean environment. When used consistently, BioPure prevents the re-emergence of pathogenic bacteria.

Ingredients

Purified and structured water, organic sugar cane molasses, lactobacillus cultures, organic mineral powder, sea salt, organic rice bran, vanilla extract.

How To Use It

BioPure is highly concentrated and should be diluted with water before use in the spray bottle sold with the concentrate. For best results, dilute 2 capfuls with 500ml of non-chlorinated water and use the dilution within 30 days. For less frequent usage, dilute 1 capful in 250ml of non-chlorinated water and use dilution within 30 days.

Basic Usage Guide:

Use	Dilution 1:50 = ~2 capfuls in 500ml bottle	Application
Bathroom and Toilet	1:50	Spray dilution onto surfaces and wipe clean. Use 1 – 2 times per week or as required.
Kitchen Benches and Sink Tops	1:50	Spray dilution onto surfaces and wipe clean. Use as required.
